## Introducing....

**Versatility and Selection...** Banvil 2000 stocks a wide range of air movement products from residential decorative fans to heavy duty industrial / commercial fans and controls.

**Best in Class Lighting Products...** They carry a full range of recessed and track lighting products covering both incandescent and LED energy saving lighting technologies. In addition, they have a growing range of LED floodlighting mostly D.L.C. (Design Lights Consortium) approved, with C.S.A (Canadian Standards Association) and U.L. (Underwriters Laboratory) approvals.

**Unmatched Warranties...** They are an industry leader in product warranties with most of their newest LED products covered for up to 50,000 hours.

**Fast Turnaround...** They carry current product inventory (usually shipped within 24-48 hours) in 2 large Ontario based warehouses, with additional inventory in British Columbia to supply Western Provinces.

**Customization...** They have an in-house service department to assist and / or adapt most products to customer required specifications and assist in specialty applications.

## E-Motion Gesture

- Touchless on/off
- Touchless dimmer
- Prevents transfer of germs and bacteria
- Prevents dirt on walls and switch plate
- ActiveSaver energy saving auto-off setting
- Wall wash nightlight

In the busy workplace, public facility, or even at home it is common to see the accumulation of dirt on light switches and the wall area surrounding the switch. The touchless gesture controlled e-Motion is an attractive solution to that problem, but more importantly it also eliminates the transfer of germs that pose a serious health risk to the inhabitants.

The e-Motion gesture switch is an intelligent, touchless, multi-function light control switch that reacts only to the intent of the user and ignores random movement.

## Experience The Center

The Center redefines the showroom experience and exhibits Light & Technology like never before! Located at the Intense Lighting corporate headquarters in Anaheim, California, the new 6,000 square foot state-of-the-art interactive training and education facility serves as the ultimate venue and new resource for lighting professionals not only in Southern California but also across the country.

Showcasing the perfect synergy between Intense Lighting luminaires and Leviton controls, The Center invites designers, architects and the lighting community to experience emerging LED technologies and smart intuitive controls in true-to-life settings.

The Center features a fully immersive showroom designed for education and hands on demonstration. Equipped with cutting-edge multimedia enabled conference rooms, the space is ideal for product training and educational seminars designed to further knowledge on topics ranging from challenges in lighting design to Title 24 code compliance.

## Schedule A Tour

To schedule a facility tour or to reserve meeting space please complete and submit the [Visitor Request Form](#) or contact their Lighting Experience Specialist, Brandon McGurer (714) 768-6207 or via email at [BMcGurer@intenselighting.com](mailto:BMcGurer@intenselighting.com).

Facility tours are by appointment only.

Leadership in Energy & Environmental Design

## Green Business Practices

Intense Lighting is committed to preserving the environment and maintaining environmentally sound business practices. From sustainable design and manufacturing to energy conservation and reduction of office waste, they are committed to continually making eco-friendly decisions to minimize overall environmental impact. While architects and specifiers strive for energy efficiency and LEED certification, Intense values sustainability as just an important factor as their customer base.

Intense Lighting continues to seek the most energy efficient LED technologies to integrate in to their products and continually collaborate with dimming and controls manufacturers to ensure compatibility with Intense Products.
