LED Bevel Top  
Louver Bollard 3

### Emco:

Ecoround 3

Avalume 3

Decolume 3

Avaround 3

## Meet Sam Westra

(Photo by Jeremy Kinzel)

Before working here at Sunrise, Sam worked at Starbucks while attending Expression Center in Emeryville, CA and received his Bachelor of Applied Science, Sound Engineering degree.

Sam has been working closely with our head quotes associate, Jeremy Kinzel, learning submittals and quotes, along with running our warehouse. "Sam has caught on quickly. I have been very impressed with his motivation to learn more." (Quote from Jeremy Kinzel).

Sam Westra is our newest hire in quotes. He joined the Sunrise team in June 2008 and has been a great addition to the team!

Sam's positive attitude and determined work ethic adds greatly to the dynamic of the office. He definitely has a bright future ahead of him here at Sunrise.

## March Reminders

*March 17 - St. Patrick's Day*

## Gardco Site Lighting

An inspiration born of classic forms and thirty years practical experience, Gullwing is equal parts architecture, engineering and performance. This is a luminaire where the lines between form, function and performance are indistinguishable. By virtue of its minimal, contoured form, integrated die cast construction and powerful optical systems, it has changed the shape of high performance lighting.

Gullwing

Pyramid

Gardco Pyramid is a monumental statement in form following function, with a classic housing shape conceived from the need to surround a new state-of-the-art optical system. Like the ancient structures that have stood the test of time, Pyramid is expertly crafted and perfectly proportioned - a convergence of pleasing aesthetics and flawless functionality. Pyramid can complement a wide variety of architectural styles simply through how one specifies the attachment of the luminaire to the pole. In all configurations, Pyramid is versatile and user-friendly.

Circa is ready to change the shape and personality of high performance area lighting. Presenting an inspired, sculptural design, Circa presents a perfect symmetry - slender, soft and inviting. It's streamlined, wind-cheating aesthetics, combined with Gardco's legendary glare-free performance, once again brings true innovation to site lighting. Circa is available in post top or side pole mount and with an optional adornment ring.

Circa with LED Ring

**Gardco Organics**

A true statement in organic forms, this line of building mounted luminaires is a natural fit with today's architecture.

**Fascia Plates**

These plates turn the architect's pen into brushstrokes of light that turns ordinary facades into landmarks. This is light to wash, identify, and instinctively draw the eye to signature properties.

**LED Bevel Top Louver Bollard**

The most sophisticated and versatile LED walkway lighting product available by combining refined aesthetics, exceptional light output, and maximum energy savings.

**EMCO SITE LIGHTING**

Emco provides a high quality and architecturally pleasing alternative for higher priced luminaires. The fixtures below are examples of the array of site lighting available in the Emco family.

The *Avaround* offers a soft edge, low profile, contemporary look to both day and night-time environments. The *Decolume* is a modern shoebox luminaire with a precision segmented optical system which provides required light levels, even illumination, wide pole spacings, and glare control. The *Avalume* is a rectangular area luminaire defined by its sleek rounded profile and rugged construction. The *Ecoround* is a tapered cylindrical post-top mounted area luminaire with twin parallel yokes that are high-strength steel tubing which provide luminaire support without obstruction of light distribution
