Daybrite Lighting Institute

Last week Ashley Dill and Megan Brisby had the opportunity to visit DCO's Lighting Institute. Their training consisted of seminars on the history of Daybrite and lighting techniques, applications, and solutions in a state-of-the-art lighting showroom. They also received factory tours where they got to see how DCO's products are made, from start to finish.

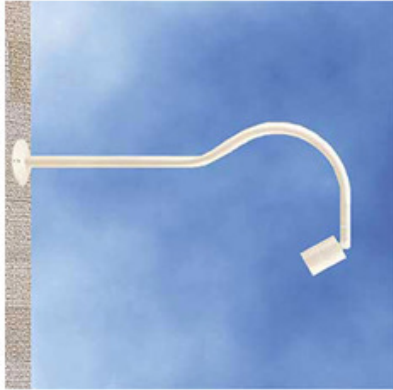

The Lighting Institute is a great example of Daybrite Capri Omega's efforts to keep their reps and customers up-to-date on DCO, along with the most updated lighting technology and products. Their lighting showroom's ceiling has a plethora of fixtures, presenting a good outline of available lighting options. Along with their decorated ceiling, they also have mock-up rooms along the outsides of the classroom to demonstrate different lighting needs in an array of applications.

"Besides getting to meet the great people of Daybrite, I got to learn a lot about the company. From the factory tours where their products are made, to the in-class training on new product, my knowledge of the company grew tremendously. Daybrite did such a great job presenting products and services in a way that everyone, from the newest of lighting agents to the lighting veterans, could benefit from. All I can say is Daybrite has some great new ideas that are sure to impress you." (Quote from Ashley Dill).

BK Lighting

Sign Star Series

- Mounts unobtrusively to a building fascia
- Available in multiple arm styles
- Almost disappears during daylight hours, leaving the architectural design unblemished
- Can be mounted in an up or down light position
- Available in multiple cutoff styles to meet various lighting requirements

Yosemite Series

- Features exclusive "interchangeable optics modules"
- Creates dynamic lighting effects with spot, flood, or wall wash reflectors
- Mounting system with exclusive "aim and lock technology"
- Available accessories:
 - *Cutoff visor
 - *Cutoff snoot
 - *Adjustable barn doors

Yacht Star Series

- Small, precisely machined aluminum construction
- Provides maximum cutoff and glare control
- Marine duty construction allows use in adverse environmental applications

Mammoth Series

- Sleek up/down wall mounted fixture
- Constructed out of high quality machined aluminum components
- Available in multiple powder-coated colors
- With its stylish design, the Mammoth Series provides great performance from an architectural outdoor fixture

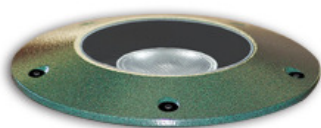

Tenaya Series

(MR 16 Quad)

- Corrosion-free housing
- *Optilock* mechanism
- Shock resistant, tempered 3/8" flat glass lens
- Self evacuating air-tight lamp module
- Patented *Hydrolock* technology provides a failsafe barrier between junction box and interior components

Precision 2 Series

- Patented housing design effectively prevents water entry
- Face plates are suitable for walk-over and drive-over applications
- Exclusive *Optilock* guarantees precision
- Patented *Hydrolock* technology proves a failsafe barrier
- Anti-siphon valve
- Provided with two high temperature silicone "O" ring seals

Glow Star Series

- Can be used as a decorative marker, an uplight, or a small area path-light
- Provides unique lighting patterns
- Constructed of machined aluminum or solid brass components
- Used with colored filters, several exciting visual displays of light can be produced
- Glow Star Mini Bollards will light the way for many years to come
